

Chris Carlton

I am looking for the type of working environment that will challenge my skill set and allow me to learn. I want to work with a group of people who enjoy coming to work in the morning. I want the opportunity to be an innovative team member in a successful organization.

3630 Green Farm Rd
Perry, FL 32347

SharePoint - 8 years

Software development - 10+ years

Software troubleshooting - 10+ years

** I am also a Veteran. I served in Operation(s) Iraqi Freedom and Enduring Freedom as a Sergeant E-5/Squad Leader, and various hurricane cleanup efforts.*

EDUCATION

NFCC, Madison Fl — A.S. Computer Networking Technologies

Aug 1998 - May 2000

I worked on campus in the computer labs and was also in several theater department productions.

PROJECTS

Facility Locator Android App — AHCA

I wrote the Android version of the Facility Locator app. The app used a .Net API, which I also helped develop, to generate an RSS feed based on user input and displayed that info on a map.

Application Server Log File Analytics — AHCA

As a State Agency, AHCA was required to keep certain data. I used several batch files and automated tasks to copy the web server log files from various application servers to a central server and store them and perform cleanup. This kicked off a third-party analytics application to read the log files and generate reports.

IP Camera Setup — W. G. Yates & Sons

I set up and connected a server and DVR application for an IP camera network in a newly constructed multi story building at the GP mill in Perry Fl.

Warehouse Mobile Data Entry — W. G. Yates & Sons

I installed hardened tablets on all the forklifts, and set the tablets up to use a centralized remote desktop that would ensure no loss of data in the event of a loss of wireless connection and would allow the tablets to automatically reconnect.

Multiple Network/Domain Migrations — W. G. Yates & Sons and NAMMO

I assisted in the planning and automated multiple tasks using PowerShell, Batch files, and VB script during these migrations that took place after each company was purchased, saving several hundreds of man hours that would have been required to manually transition PC's and equipment to the new domain.

Packout Desktop App — NAMMO

I developed a desktop application in C# for the shipping department to photo and store batch info as products are being prepared for shipping.

SQL - 5 years
SSRS - 5 years
System Administration - 10+ years
TCP/IP - 10+ years
UI - 10+ years
Visual Studio - 10+ years
VMWare - 5 years
VPN - 5 years
vSphere - 5 years
WDS - 5 years
Windows Server - 10+ years
WordPress - 10+ years
XML - 10+ years

AWARDS

1st Place in the AHCA Annual Chili CookOff

LANGUAGES

English, Pig Latin, and some Klingon
